ERIK F. LARIOS

Entry-Level IT Support & Cybersecurity | Secret Clearance (Current) | CompTIA Security+

Colorado Springs, CO | (210) 895-2039 | erik.larios720@gmail.com | linkedin.com/in/eriklarios

PROFESSIONAL SUMMARY

Army veteran and former Sergeant (E-5) with a **current Secret clearance** and **active CompTIA Security+**, ready to start on cleared work without waiting on an investigation or certification. In Iraq I trained 50+ people with no medical background to a 90% first-attempt pass rate and stood up a backup treatment facility in 10 days. I bring the same habits to IT: learning systems fast, documenting precisely, and protecting sensitive data, with 100+ confidential records handled over 5+ years and zero breaches. I write JavaScript and React and am adding Python now. Seeking an entry-level IT support or cybersecurity role on a defense or federal team.

CLEARANCE & CERTIFICATIONS

- **Secret Security Clearance** – Current, eligible for reinstatement
- **CompTIA Security+** – Active, exp. Mar 2029
- **Development Certifications:** HTML/CSS, JavaScript, React
- **In Progress:** Python coursework (Oct 2026)

PROFESSIONAL EXPERIENCE

Sergeant (E-5), U.S. Army **Nov 2020 – May 2026**

2nd Forward Resuscitative Surgical Detachment | Licensed Practical Nurse *Iraq deployment: Mar – Dec 2024*

Army Commendation Medal with "C" Device

- Qualified **50+ soldiers and civilians** with no medical background in Combat Lifesaver skills, with a **90% first-attempt pass rate**, by designing and teaching classroom and hands-on casualty-care courses during a combat deployment.
- Stood up a fully equipped backup treatment facility in **10 days**, so casualty care could continue if the primary site went down, by planning the layout, inventorying supplies and equipment, and running pre-operation readiness checks.
- Maintained **100+ patient and personnel records** with **zero confidentiality breaches** over 5+ years by enforcing HIPAA and military access-control rules on who could view, edit, and release sensitive data.
- Kept a team of **3–4 soldiers** at full training and accountability compliance through a 10-month deployment by tracking certification deadlines, scheduling training, and auditing readiness records.

TECHNICAL PROJECTS

Barbershop Website *HTML, CSS, JavaScript, Git*

Built a responsive business website with interactive features and mobile-friendly layouts; managed source code and version history with Git and GitHub.

React Web Application *React, JavaScript, Vite*

Developed a component-based application using reusable components, props, state, and hooks; debugged and tested functionality with browser DevTools.

Personal Portfolio *Next.js, React*

Built a personal portfolio site in Next.js and React to present technical projects and professional background.

TECHNICAL SKILLS

Security: Access Control, Information Security Principles, Risk Management, Data Confidentiality (HIPAA)

Networking: TCP/IP, DNS, DHCP, VPN Fundamentals

Programming: JavaScript, HTML5, CSS3, React, JSX, Next.js, Python (in progress)

Tools: Git, GitHub, VS Code, Vite, Browser DevTools
