ERIK F. LARIOS

U.S. ARMY VETERAN | SECRET SECURITY CLEARANCE | COMPTIA SECURITY+

Colorado Springs, CO | (210) 895-2039 | erik.larios720@gmail.com

PROFESSIONAL SUMMARY

U.S. Army veteran and former Sergeant (E-5) with over five years of service, a Secret Security Clearance, and CompTIA Security+ certification. Seeking entry-level IT support or cybersecurity opportunities. Brings a foundation in networking (TCP/IP, DNS, DHCP), access control, and risk management, plus hands-on scripting and development experience. Proven leader in high-pressure, detail-critical environments, including a combat deployment to Iraq.

CERTIFICATIONS & TECHNICAL SKILLS

CERTIFICATIONS & CLEARANCE

- Secret Security Clearance
- CompTIA Security+
- HTML/CSS Certification
- JavaScript Certification
- React Certification

SELECTED PROJECTS

Barbershop Website **HTML | CSS | JavaScript**

Built a responsive business website with interactive features and mobile-friendly layouts; managed source code with Git and GitHub.

React Web Application **React | JavaScript | Vite**

Developed a component-based application using reusable components, props, state, and hooks; debugged and tested functionality using browser DevTools.

Personal Portfolio **Next.js | React | VS Code**

Created a personal portfolio using Next.js and React with Claude assistance in VS Code to present technical projects and professional background.

PROFESSIONAL EXPERIENCE

Sergeant (E-5) | Licensed Practical Nurse (LPN/LVN) **U.S. Army**

November 2020 - May 2026 | Iraq deployment: March - December 2024

Military Award: Army Commendation Medal with "C" Device

- Supervised 3-4 soldiers, overseeing training and personnel accountability in a small Army medical unit (2nd Forward Resuscitative Surgical Detachment).
- Trained 50+ soldiers and civilians who had no prior medical experience in Combat Lifesaver (CLS) skills through classroom presentations and hands-on casualty-care instruction during deployment to Iraq.
- Collaborated with a medical team to establish an alternate treatment facility in Iraq; planned the setup, organized supplies, prepared equipment, and verified readiness to support casualty care and damage-control resuscitation if the primary facility became unusable.
- Safeguarded sensitive patient and personnel information and maintained accurate documentation in accordance with military confidentiality requirements and established procedures (HIPAA).
